

Easily manage your data devices

INDUSTRY

Factory automation is the interconnection of factory equipment to improve the efficiency and reliability of process control systems. It absorbs smart technologies as well. IoT helps reduce costs, increase productivity, and safety for human workers as well as for the industry as a whole.

APPLICATIONS

Remote production control

Predictive maintenance

Asset Tracking

Logistics management

SOLUTION

SIMcontrol is the easiest way to deploy and manage high-risk SIM cards in factory automation applications using a single online platform.

COST-EFFECTIVE

Managing your spend and risk on SIM deployments is key. Our platform eliminates the risk of SIM abuse and reduces data connectivity costs.

QUICK & EASY

Try it out today with existing SIM cards. We also supply SIMs in bulk and take care of activation and provisioning hassle.

RELIABLE

SIMcontrol has over 10 years of proven success. Partner with us for your SIM management and get access to fast turnaround on technical support queries.

MULTI-NETWORK

We are mobile network agnostic - choose SIMs from any mobile network that best suits your deployment. We also offer local connectivity services in numerous African countries, or use our Global Roaming solutions for cross-border connectivity.

REQUIREMENTS

Easy SIM management at scale

Network coverage in remote areas

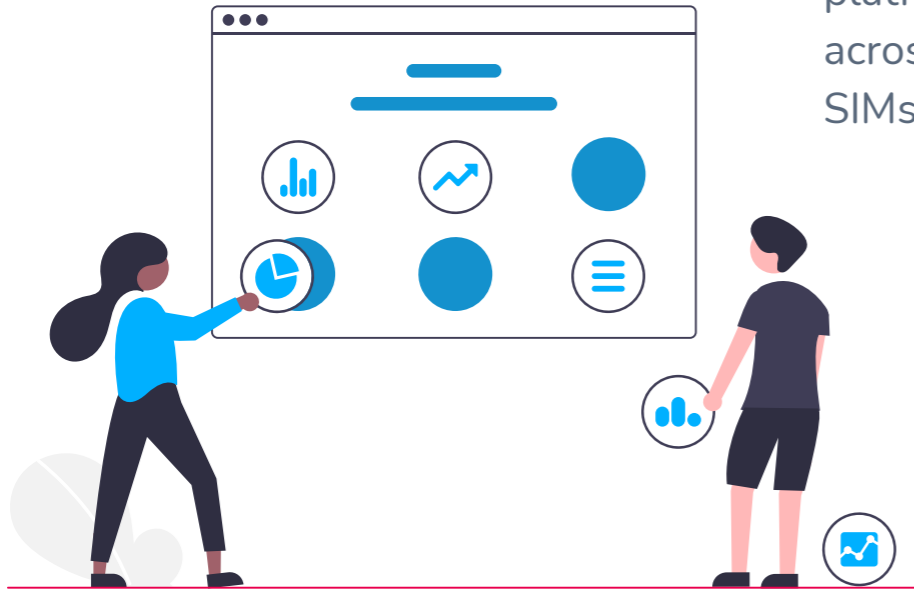

Quality data connectivity

Risk Management

POSITIVE RESULTS

Managing SIMs in high-risk data devices deployed in the field can be hard. SIMcontrol makes it easy and cost-effective. Our platform helps industrial automation technology companies across Africa to reduce the hassle and cost of managing device SIMs at scale.
